

ANGUS BEEF AT ITS BEST

We supply farm-raised and fed pure Angus beef that is all natural, free of growth hormone and antibiotic stimulants.

We have taken the time to optimize a feeding regimen that keeps the animals naturally healthy. This process is rooted in the knowledge that grass fed cattle in their natural environment can prosper and grow to provide us with the healthiest, most nutritious beef. Our finishing keeps the animals on grass supplemented with Tennessee's protein-rich sweet alfalfa hay; we are committed to providing the consumer with Angus Beef at its best.

Oak Farms Angus are raised on our farm from American Angus Association registered Angus stock. We have chosen and breed our animals with the express intention of optimizing the Angus' natural genetic excellence for meat tenderness and taste.

OAK FARMS

Oak Farms All Natural Angus Beef

dry-aged beef, raised on Tennessee's cool season grasses and custom finished with an all natural feeding regimen designed to optimize nature's best beef flavor.

Oak Farms
Sweet Alfalfa Angus®

ANGUS BEEF AT ITS BEST

Oak Farms provides fresh, USDA inspected beef directly to the consumer or to meat markets and butcher shops.

For the consumer, we deliver your meat frozen and wrapped with package quantity to your specifications.

For the butcher, Oak Farms will custom cut and supply the beef as the whole or half carcass, or cut into the select primal cuts that you may require.

All of our meat is processed and dry-aged for 14-16 days in order to provide the peak in natural flavor and beef tenderness.

All natural, USDA Choice or Prime pure Angus beef
